

Abstract of the Disclosure

Apparatuses, systems and methods for multiple display devices are described. A display apparatus includes a primary display device for a computer. The display apparatus also includes at least one secondary display device for the computer with the at least one secondary display device being operatively coupled to the primary display device. Moreover, the at least one secondary display device is stored in a housing behind the primary display device, such that the at least one secondary display device can be extended from the housing and used to display information for the computer.
